## Text

- Cable lug or copper bus must accept M16x30 screw.
- Do not lubricate or treat contacts.
- Switches may only be mounted, connected and set into operation by qualified persons according to the accepted rules of technology.
- Terminals with factory fitted jumper links are tightened during production. Take care during installation to ensure factory fitted links are not lost by undoing both sides of linked terminals. After wiring, all terminal screws must be tightened to recommended torque specifications.
- After installation of the switches the spacings between the terminals must be sufficient to fulfill the requirement of the applicable standards.

| Operating temperature |                       |
|-----------------------|-----------------------|
| Min. Temperature [°C] | Max. Temperature [°C] |
| 25                    | 60                    |
